

Starbucks Person Annotation Rules

Label Classes

0. Lying
1. Sit
2. Stand
3. Squat
4. Other

Label Tools

Vmaxx_annotator v1.0

Label Format

(*Ignore this part if you are not developing the annotation tool*)

	Label	X	Y	W	H
(example:	0	0.22323	0.234	0.453	0.5643)

Description:

Label -- refer to the label and class table

X -- X coordinate of the center of the bounding box

Y -- Y coordinate of the center of the bounding box

W -- width of the bounding box

H -- height of the bounding box

Note: all the numbers are presented as percentage, i.e., (pixel coordinate)/(width or height of the image)

Annotation Rules

1. Annotate people with different actions (label classes) in the form of bounding boxes.
2. Any size of human-recognizable person (adults and kids) should be annotated.
3. Bounding box must be placed close to person. Background should not be included too much in the bounding boxes.
4. For person (adults and kids) at the edge of the images. If more than 50% of their body can be seen, then they should be annotated as the corresponding class, otherwise they should be annotated as "Other" .
5. People who are relatively small in the distance of the image need not be annotated if they are not lying on the ground.
